HOLLOWAYS PILLS. I HIS Medicine is universally admitted to be the most efficacious remedy known to the world. No preparation is so suitable to the climates of India and China as this fine and invigorating medicine. I is particularly adapted to the constitution of European ladies, as it is never failing in its effects in all diseases peculiar to females, while those who are attenuated by the debilitating effects of the above climates will of April, 1868. find in this wonderful remedy a kind of talisman whereby they may insure a restora-

tion to robust health. HULLOWAY'S OINTMENT, The science of Medicine has never before produced any remedy that can be compared to this wonderful Ointment, as it cures after all other means have failed, all wounds, sores, ulcers, and also the most inveterate skin diseases peculiar to the climates of India and China. It is the true friend of the Soldier and Civilian, as certain old sores can be removed by it that LEAD and METALLIC COFFINS, on the | cannot be conquered by any other treat- | Company.

THE CHINA MAIL.

HONGKONG, FRIDAY, AFRIL 17, 1868. THE HONGKONG ASSOCIATION. THE meeting of China residents, of which we gave a report yesterday, is without doubt satisfactory, as tending to direct home public attention to this colony. The report so fully speaks for itself that much comment is unnecessary, save upon one point of vital importance to Colonial interests. Mr Kingsmill, whose opinion seemed to be strongly endorsed by a ma. jority of his hearers, and whose remarks were, in the main, thoroughly to the point, backed the opinion of the Chairman that the home "Hongkong Association" was not to be an echo of the Colonial Association. These gentlemen talked a good | Cash only." Deep dog that! they had banded themselves together to advance whatever views might be put forth by resident colonists, and instanced the late Memorial as a document they would not like to adopt. Without, at this moment, discussing the various questions which might be raised as to that document or any other proceedings which have been taken in this Colony, we must him, but investigation disclosed the fact confess to sharing Mr Gibb's opinion that the Home Association should aim at | we now learn, "smooth talk and a general carrying out the views of the Colonists with of course the proviso that action should be limited by the superior facilities which it possesses of judgupon parliamentary attention. We would, in fine, make the local, subordinate to the [home, Association. Let all resolutions, memorials, etc., etc., be, in the first case, transmitted to the rangement like this be not arrived at there will be little help gained from our doubt as to which will prove the more powerful. We sincerely trust that the "Mr Massett gives a capital imitation of proper end to this case would be, that the Hongkong body will, in their next com- an affected Englishman. We have not the slightest intention of finding fault with Missions, so long as their promoters refrain from Henry E. "That, there were two features in connection with the Amoy Mission to which he could not help adverting. The first was the great desire and the great readiness to receive the truths of the Gospel which had been manifested in China, and which was so much greater than among the natives of Hindostan. Another and very striking feature was the remarkable and extensive use that had been made of native agency in carrying out the operations of the mission,"

Now, as regards the second assertion. we have nothing more to say than that the gallant General's rendering of the words "remarkable and extensive" differs from the commonly received versions. But as regards the assertion respecting the "great desire and great readiness to receive the truths of the gospel" manifested in China, we pronounce it to be utterly unfounded in fact. was charged with having attempted to com. fore eminently a case for the severest If those who claim support from people at home condescend to employ falsehood as an agency, or even put forth misstatements from ignorance of the truth the some?

Shortrede & Co.) LONDON: N. TRUBNER & Co.

Price, \$5, leather half bound. Opinions of the Press.

(Singapore Free Press, May 9.) We referred briefly, several days ago, to a new work published by Mesers. A. Shorttede & Col, of Hongkong, entitled " The Treaty Ports of China and Japan." But would be utterly impossible, in a condensed notice of such a work, to give an livequate idea of its contents. The historical events of interest since the foundation of the settlement of Hongkong, are perhaps too much condensed into a general summary; but the most important feature in the composition of the society of the present colony, is detailed at greater length When we come to consider that the book before us makes no pretensions to beis hist fory, but werely a guide book, we cannot hesitate to pronounce it at once the most complete work of its kind ever issued. The Appendix may be termed the China Bradsliaw, and the text teems with interesting papers, -historical, botanical, and descriptive. The maps and plans are useful illustrations of the geographical position of the Missionaries and Residents in the bega to call the attention of the public to the follow- treaty ports, and a valuable assistance both to travellers and residents.

From the Englishman (Calcutta) of June 8:-"The celebrated volumes of the French Abbé Huc on China, and Sir Rutherford Alcock's account of Japan are no doubt, works of a far higher class and more extensive scope than the one now before us; but for practical utility for all purposes of locomotion, trading and residence in any of the places coming within its compass, The Treaty Ports of China and Japan, by Messrs Mayers, Dennys and King, far surpasses them. It is difficult to Queries;" this publication will be really know under what class of books to place it, useful, it contains much matter relating to for it contains a mixture of history, topo- China which otherwise would be lost, and graphy, hygiene, Murray's Hand-book and we wish it every success. A work of the kind was much needed, to place within reach of the general public information regarding the districts

in which they reside that had hitherto been concealed under the mysterious hieroglyphics of the Chinese language, or at best open only to sinologues. The modest hope expressed by the authors, that much will be found in the present book that is new and unknown to the general reader, is, we think, fully justified. * * * Hongkong and Canton, for example, each occupy more ers, and other deli- than 100 pages, comprising every conceivable particular regarding them, from their history native and foreign, to particulars of the geological formation and botanical lish between Europe and China. wealth of the neighbourhood. * * * Not the least interesting feature in the book under review, is the insight it affords us into the character of the population in different parts of this vast empire. * * * One and Japan." Shanghai Recorder May 7, and Supreme Court and Consular Gazette, May 11, 1867 -A very useful book has just been issued from the Press in Hongkong under the title of the "Guide Book and Vade-mecun to the Treaty Ports of China and Japan, compiled and edited by Mr N. We feel it to be a public duty to take the first opportunity of calling attention to the "Guide Book and Vade Mecum" just is sucd for "travellers, merchants, and residents in general," in the Treaty Ports of China and Japan, by Messrs Shortrede & Co., of Hongkong. * * * The order of description of the various places follows their position on, or from the coast, as we go northward. In each instance the histo-CUM FOR TRAVELLERS, MERCHANTS, ry, position, means of access, accommodation, foreign residences, public buildings, community, mode and cost of living, cli mate, associations, amusements, places of ingovernment, natural history, productions and statistics of trade are given, along with a miscellaneous detail of facts and incident in connection with particular localities. So far as we are able to practically test the in dividual descriptions of the various places, they are given with a considerable degree of fairness and fulness. Peking, Yedo, and Macao are wisely included in the general survey. * * * The value of the book is greatly increased by a most copious index. and the work closes with a set of useful appendices, ... The last of these is the greatest novelty of the work. It consists of a bibliographical index of all formal works pubshed from the earliest date in the English language on China and Japan, Philological boc s are, for some reasons best known to the compilers, entirely excluded.

We hope to see this omission repaired in the next edition. With the exception of the comparative thinness of the paper, the getting-up of the work is very creditable to all concerned; and we have sincere pleasure in congratulating the authors and publishers on the considerable merit of their admirable enterprise and performance.
